

## 03 Food safety and nutrition procedures

### 03.1 Food preparation, storage and purchase

#### General

- All staff have attended appropriate food hygiene training for the level of food preparation carried out.
- The setting manager is responsible for overseeing the work of all food handlers to ensure hygiene and allergy procedures are complied with.
- The setting manager is responsible for informing Core Committee, who then reports to Ofsted, any food poisoning affecting two or more children looked after on the premises. Notification must be made as soon as possible and within 14 days of the incident.

#### Purchasing and storing food

- Food is purchased from reputable suppliers.
- Parents are requested not to bring food that contains nuts. Staff check packets to make sure they do not contain nuts or nut products.
- All opened dried food stuffs are stored in airtight containers.
- Dried packaged food is not decanted from packaging into large bins or containers as this prevents monitoring of sell by/use by dates and allergen information.
- Food is regularly checked for sell by/use by dates and any expired items are discarded.
- Items are not stored on the floor; floors are kept clear so they can be easily swept.
- Soft fruit and easily perishable vegetables are kept in the fridge at 1- 5 Celsius.
- Fridge and freezer thermometers should be in place. Recommended temperatures for fridge 37 degrees Fahrenheit (3 degrees Celsius), and freezers 0 degrees Fahrenheit (-18 degrees Celsius).
- Fruit and vegetables stored in the fridge are washed thoroughly before refrigeration to reduce risk of pests and E.coli contamination.
- Staff's own food or drink should be kept in separate designated area of the fridge.
- Items in fridges must be regularly checked to ensure they are not past use by dates.

#### Preparation of food

- Food handlers must check the content of food/packets to ensure they do not contain allergens.

- Food handlers wash hands and cover any cuts or abrasions before handling food.
- Separate boards and knives are used for chopping food, usually colour coded.
- All vegetables and fruit are washed before preparing.
- Food prepared for children with dietary needs and preferences is clearly labelled and every effort is made to prevent cross-contamination.
- Raw eggs are not to be given in any form, such as mousse or mayonnaise.
- When given to children, eggs are fully cooked.

### **Serving Food**

- Staff risk assess the likelihood of children with dietary restrictions accessing the food of other children and must take appropriate action to prevent this from happening, for example:
  - check the list of children's dietary requirements displayed in the food preparation area
  - coloured plates
  - place mats
  - other methods as agreed by the setting manager
- Children with allergies/food preferences are not made to feel 'singled out' by the methods used to manage their allergy/food preference.
- Food served to children with identified allergies is checked by the key person to ensure that the meal (and its ingredients) does not contain any of the allergens for that child.
- The child's key person remains present throughout the child's mealtime.
- Tables are cleaned before and after, with soapy water or a suitable non-bleach product.
- Members of staff serving food wash their hands and cover any cuts with a blue plaster.

### **E.coli prevention**

Staff who are preparing and handling food, especially food that is not pre-prepared for consumption e.g. fruit and vegetables grown on the premises, must be aware of the potential spread of E.coli and must clean and store food in accordance with the E.coli 0157 guidance, available at:
